5. With feedback signal and LED light

6. Working voltage: 12 to 18 V
7. Working current: 100mA

Detailed pictures, OEM / ODM available More details for the front / rear side and Accessories

Our electrical control block has used the most advanced production capabilities and the best production technologies.

The lock can be opened by electrical devices by turning the button or key. It is highly secure and anti-theft. Also, it can prevent someone from opening the padlock with other tools.
This lock can be used for the doors of residential buildings, in particular the public door of the residence, government buildings, schools, hotels, factory stores, etc. Also compatible with the electric control door.
The coil inside the lock is flame proof. It won't work when it works for a long time. If on but the lock does not work, check the installation or send it to the agent for repair.
The internal structure of this lock has been improved, preventing the opening of the lock by beating on it. this will make you more secure.
