RFID UHF Metal

- RFID UHF Metal tag is a metal tag that is used for identification and tracking of metal objects. The tag is made of metal and has a small antenna that allows it to communicate with a reader. The tag is used in a variety of applications, including inventory management, asset tracking, and security. The tag is also used in the automotive industry for vehicle identification and tracking. The tag is made of metal and has a small antenna that allows it to communicate with a reader. The tag is used in a variety of applications, including inventory management, asset tracking, and security. The tag is also used in the automotive industry for vehicle identification and tracking.
