2.12x12mm FDX-B RFID Dog Micro Chip Animal ID Mikrochip Pferd Rinder Kuh Haustier Chip

Spezifikation

Spezifikation

Animal Microchip Horse Tracking Chip Micro RFID Hundeimplantat Tier -

Produktname ID -Chip

Mikrochip für Viehkatze Mikrochip -Haustiere

Chip EM4305 Frequenz 125 kHz

Lesedistanz 3-20 cm hängen von Ihrem Leser und Chip ab

Bioglas Material Protokal ISO14443a

Größe 2*12 mm, 3*15 mm, 1,4*8 mm, 1,25 x 7 mm usw.

Desinfektionsmethode EO (ACM)

Typ Passiv

Herkunftsort Guangdong, China

Erinnerung 144BYTE/504BYTE/888BYTE

Proben Die Proben sind für Ihren Qualitätstest kostenlos.

Anwendung Katzen, Hunde, Labormäuse, Haustier Mink, Arowana, Lachs, Pferde,

Kaninchenverfolgung usw.

PRODUCT INFORMATION

1.25*7mm 1.4*8mm 2.12*12mm

SMALL SIZE WITHOUT AFFECTING PERFORMANCE

ICAR certificated

- 134.2K/125K FDX-B format with 16-bit encoding, most scanners can be read
- Small size and light weight
- Quickly and safely injects under the surface of pet's skin
- Wide range of applications, suitable for most pets, animal husbandry, fish, wildlife, etc.

WORKING PRINCIPLE

How Does Animal Microchip Work?

 Scan the pet to verify whether he or she hasa microchip that has been previously implanted.

2.Scan the microchip pack to verify that the microchip is functional, and that the ID code matches the accompanying barcode lables.

 Implant the microchip, then rescan the pet to verify that the microchip can be localized.

 Do not forget to record the tracking number of the microchip.

Implantation Sites for Microchips

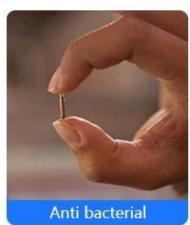

Microchips are most often implanted in animals as outlined in the diagrams above. When scanning dogs and cats, begin in the neck area where the microchip is most likely to be located, but be sure to scan slowly and patiently. Scan repeatedly and over the entire body to ensure whether or not a microchip can be localized.

CUSTOMIZATION

Anti-bacterial

SUITABLE FOR ALL KINDS OF ANIMALS

Species reproduction

Animal husbandry

Biological identification
