— Installation Guide —

1. Installing the lock panel

Put the PCB line through the door hole, straighten the panel and fix it by a panel fixed plate and 2 pieces of 3*12 machine screws. (Note: please put the PCB line through the slot of the fixed plate) (Shown as picture 2)

Picture 2

2. Installing the lock body

Firstly, connect the PCB line on panel with that on lock body; Secondly, straighten the lock body to let the latch bolt in the opening side of the door. Thirdly, take the battery cover down and fix the lock body by 2 pieces of 4*20 and 1 piece of 4*35 countersunk head self tapping screws (Note that the screws should be countersunk totally). Then, put in 4 pieces of AA 1.5V alkaline batteries. Lastly, fix the battery cover by a 3*6 countersunk machine screw. (Shown as Picture 3)

Picture 3

3. Installing the lock catch

Fixing the lock catch in the locker of a suitable height by 3 pieces of 4*16 countersunk self tapping screw. (Note: make sure the lock bolt can be dunked into the catch) (Shown as picture 3-1 and 3-2)
