More options.

The epoxy card / keychain is a trendy element of the smart card. The epoxy resin is coated on the printing board, so that the epoxy board is waterproof, resistant to chemicals, crystal and so on. By using the crystal drops of epoxy resin in addition to the surface of the products to obtain a good protective effect, it is however possible to increase the surface gloss and brightness, to further increase the decorative effect. So epoxy paper is widely used as NFC mobile tag or high-end products.

Application of the product

RFID key fob application
The remote control is suitable for intelligent locking systems, access control, working time recording, contactless payment or public transport ticketing systems. And the keychain has a metal ring, so it can be attached to a keychain.
