Assicurati di utilizzare il WiFi a 2,4 GHz quando ti connetti con la lampadina intelligente. E il WiFi deve essere uno stato rilevabile. Molti router dispongono di reti a 5 GHz e 2,4 GHz e il telefono si collegherà sempre automaticamente alla rete a 5 GHz. Quindi, devi disattivare completamente la tua rete a 5 GHz accedendo alle impostazioni del tuo router (inserisci l'indirizzo IP del router nel tuo browser Internet, di solito qualcosa come 192.168.1.1), costringendo il tuo telefono a connettersi alla rete a 2,4 GHz.

Inoltre, la modalità di crittografia del router deve essere di tipo WPA2-PSK e il tipo di autenticazione deve essere AES
