RFID Epoxy Tag Structure

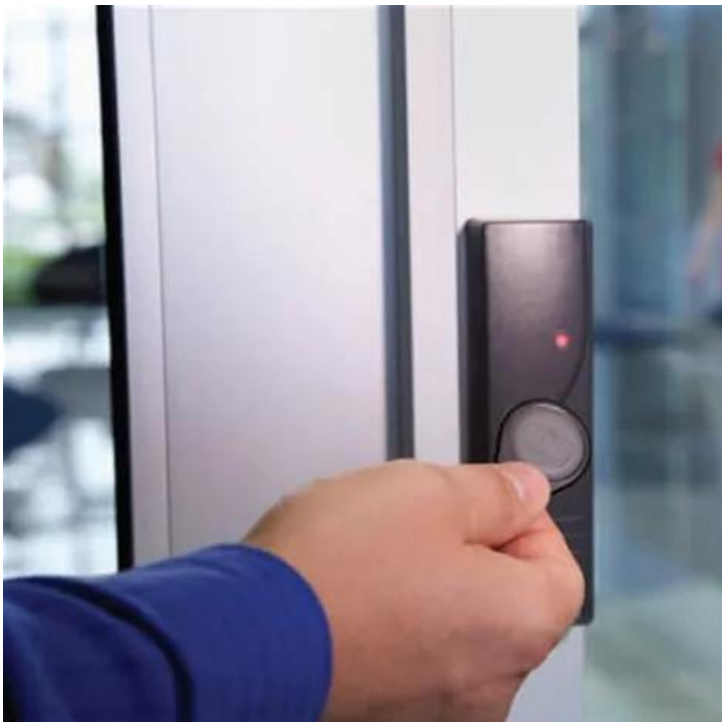

RFID

RFID is a technology that uses radio waves to identify and track objects. It is widely used in access control, inventory management, and logistics. RFID tags can be attached to various objects, and they can be read by a reader without the need for a line of sight. This makes RFID a very convenient and efficient technology for many applications.

RFID Keyfobs

For access control and other applications
125Khz/13.56Mhz/860~960Mhz chips available
OEM & ODM available
