

RFID T5577 RFID

RFID NFC

RFID Radio Frequency Identification technology is used for identification and tracking of objects. It consists of a reader and a tag. The reader sends a signal to the tag, which responds with data. This data can be used for various purposes, such as inventory management, access control, and payment.

UHF (Ultra High Frequency) RFID tags are used for long-range identification and tracking. They are commonly used in logistics and supply chain management.

NFC (Near Field Communication) RFID tags are used for short-range identification and tracking. They are commonly used in mobile payments and access control.

NFC tags can be used for various applications, including contactless payments, access control, and data exchange. They are widely used in retail, healthcare, and transportation.

Packing & Delivery

Packing

with or without polybag separate package

200pcs/ box, 180pcs/bag, 150pcs/bag

25boxes/carton, 16boxes/carton, 6boxes/carton or as required

Shipping

We have different shipping options available for your choice

International door to door Express

By Air(Faster and Cheaper for large order)

By Ship(Cheapest shipping way)

Our Service

1° 24 hours customer service

2. Professional product photography and product description

3. OEM / ODM services

4. Fashion Design / Reusable / Customized

5. Quality control

1. Sample making

2. Production

3. Quality inspection 2 weeks before shipping

6. Delivery time 1~5 days by air 7~30 days by sea

7. Payment terms T / T / Paypal / Ali

8. Shipping methods DHL / FedEx / TNT / UPS / EMS / Sea / Air Forwarders
