- [illegible]

最大周波数	79GHz
最大電圧	12V
最大電流	100mA
動作温度	25 ° C 湿度 98%
動作距離	1m ~ 6m (自由空間伝播)
最大消費電力	<2.5W
外形寸法	105x73x20 (mm)
動作温度範囲	-40 ° C -85 ° C

New 79G barrier radar

Anti-smashing radar

WeChat applet debugging/no wire cutting and wiring/
online upgrade with one-click setting

Eight major advantages

Easy to use

Millimeter wave detection
79G millimeter wave detection frequency is more accurate

High efficiency and stability
High sensitivity and high vehicle detection rate

Long lifespan
High and low temperature resistance, military quality

Automatically adapt to the environment
Suitable for various severe weather conditions such as heavy rain

Smart radar
Easy to install and maintain

Mobile phone debugging
Bluetooth connection applet debugging

Safe and reliable
Intelligent identification of vehicles and people

Easy to install
No need to cut the ground, instead of traditional ground sensor

Radar is newly upgraded

Supports WeChat applet debugging

A more convenient and worry-free setting method

Nine functions

79G ANTI-SMASHING
RADAR CHIP

BLUETOOTH
DEBUGGING

ANTI-SMASHING PEOPLE
AND CARS

SUITABLE FOR VARIOUS
ENVIRONMENTS

STRONG
STABILITY

EASY TO
INSTALL

HIGHLY
SENSITIVE

WIDE RANGE OF
APPLICATIONS

PRECISE
IDENTIFICATION

Millimeter wave radar

Sensitive sensing to prevent people and cars from being hit

A gate radar with stable performance, safety and reliability

The radar is compatible with a variety of gate machines

Applicable to straight-pole gates/fence gates/advertising gates/airborne gates
It can achieve high-precision anti-interference, strong anti-smashing,
safe and reliable features

Straight pole

Fence pole

Advertising pole

Airdrop gate

Are you often troubled by the following problems???

Grooving construction
Time-consuming and
labor-intensive

Messy line
Complex and difficult
to connect

Poor sensitivity
Cannot respond to the
car

Installation and
maintenance are
complex

Anti-smashing radar helps you say goodbye to the tedious operations you encounter,
saving time and effort!

■ Install Detector

The loop detectors must only be placed in dry rooms or control cabinets that are protected against all types of moisture and wetness. A distance of at least 10 mm from other devices must be maintained on each side. The ambient temperature must not exceed 65° C. The installation of the induction loop is described in other operating instructions.

■ Wiring Diagram

■ Operation and Indication

When the power is applied, the red Power LED will glow and the detector is tuning, the green Check LED blink about 3 seconds. The green LED will also glow whenever a vehicle is detected passing over the inductive loop. If a loop fault exists the green LED will come on and flash indicating a fault.
