RFID Tag

RFID & NFC.

RFID (Radio Frequency Identification) is a technology that uses radio waves to identify and track objects attached to an RFID tag.

UHF (Ultra High Frequency) tags are used for long-range identification and tracking.

NFC (Near Field Communication) tags are used for short-range identification and tracking.

RFID tags can be used for various applications, including inventory management, access control, and identification. NFC tags are commonly used for contactless payments and data exchange.
