The way of Circuit Connection:

OUTPUT mode 1: (Control 12V load)

Connect the COM to the Power Supply by DC12V, the Output pin will create DC12V Signal. Please check below diagram for better understanding.

OUTPUT mode 2: (Control other voltage loads)

Connect the COM pin with any other Additional Power Supply, the output will create the same Voltage signal as the Additional Power Supply. it can be Direct Current or Alternating Current. Decided by the Additional Power Supply.

Please check below diagram for better understanding.

Instructions for use

Add a new remote control: After connecting the power, press the setting button, the red light will be displayed, and the new remote control button will be pressed during the display. At this time, the red light will flash once, and the display light will be automatically after 4 seconds Off indicates successful addition

Clear the remote control: after connecting the power supply, hold down the setting button and do not release. The red light will automatically go out after about 8 seconds, indicating that the removal is successful.

Shipping Way

We are one of the leading exporter of RFID products in China since 2000 years .
