

Lift Access Control Management Elevator Controller ACM-DT20

Normal management of the Access Control are 'One for One', that means one card reader control one door. Valid card can open the door,

invalid card can not open. But we can found that in many fields, a 'One for More Controllers' are needed.

Example 1: Lift Access Control Management

We usually have ten or more floors in one lift, but you just need one card reader. The system can distinguish the user's privilege, then take them to the right floor.

If the user has multi-floor privilege, when swiping the card, he can choose the floor he want to go this time, and he can not push other floor buttons.

If the users are the security and administrator, they can go to any floor they want according to the privilege settings.

Model	ACM-DT20 20-40Floors Elevator Access Control Unit
Input Format of Reader	Wiegand 26/34bit (All card reader with compatible protocol, such as Motorola, HID, EM, Mifare one etc)
Q ' ty of users	20,000
Q ' ty of Event Buffers(offline)	100,000
Power Supply	12V DC 5A
Communication to PC	TCP/IP 10M/100M self adaptive
Number of supported floors	20floors, if need to control more, add 1more ACB-DT20K
Dimension(LxDxH)	164mm*106mm
Net weight	0.30Kg

Product Picture

ACM-WE20

One for More Access Control

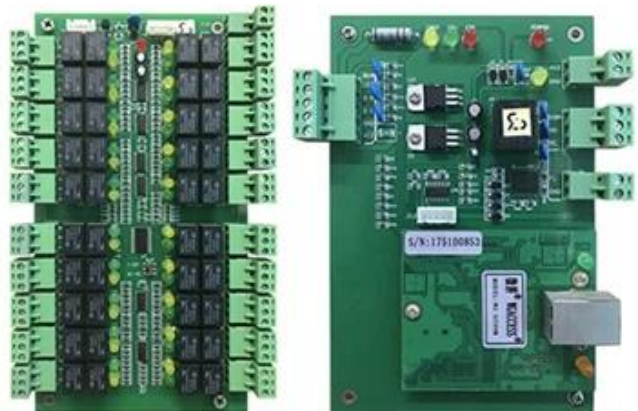

Used for lift access controller or Cabinet controller only

1. Support standard WG 26output RFIDcard reader
2. Communication: TCP/IP

ACM-WE20

Extend function board for 20floor or 20cabinet locks

1. Must work with ACM-WE20 main board
2. with 20output relay, Can control 20floor or 20cabinet locks, if with more, add 1 more ACM-WE20
