Biometric Security Rfid 4 Door Access Control System With TCP/IP for Flap Turnstile Barrier Gate

Flap Barrier Gate is a type of access control mechanism designed to manage pedestrian traffic by using retractable flaps that open and close to allow or restrict entry. These gates are widely used in areas requiring both security and smooth flow of people, such as office buildings, metro stations, airports, and other public venues.

Reliability

- SUS304 stainless steel casework ensure long-lasting durability.
- High quality electrical components.

Safety Features

- Barriers retract automatically during power outage with capacitor board installed.
- All smooth finishing. No exposed screws.
- Ergonomic design makes card and fingerprint authentication fast & simple for users.

Built-in Reader Integration

- series is already integrated with our customers' preference for either card or fingerprint access control reader.

This greatly reduces installation time & expense.

- series and associated access control readers are all factory-tested prior to shipping.
- provides true plug&play turnstiles with the lowest possible total cost of ownership in the industry.
