Show product

properties

1. Uses a nice control system and automatically closes the door by induction
2. If the customer wants to replace the general electric lock, it is time-saving and convenient, since the hole of the installation lock is continuous
3. There is no directional restriction, left, right, inside and outside and other types of other directions
No shock, automatic reset, low noise, low power and low demands on the door closer
4. Castle size: 130x98x41mm
5. With feedback signal and LED light
6. Operating voltage: 12 to 18V
7. Working current: 100mA

Detailed pictures, OEM / ODM available More details for front / back and accessories

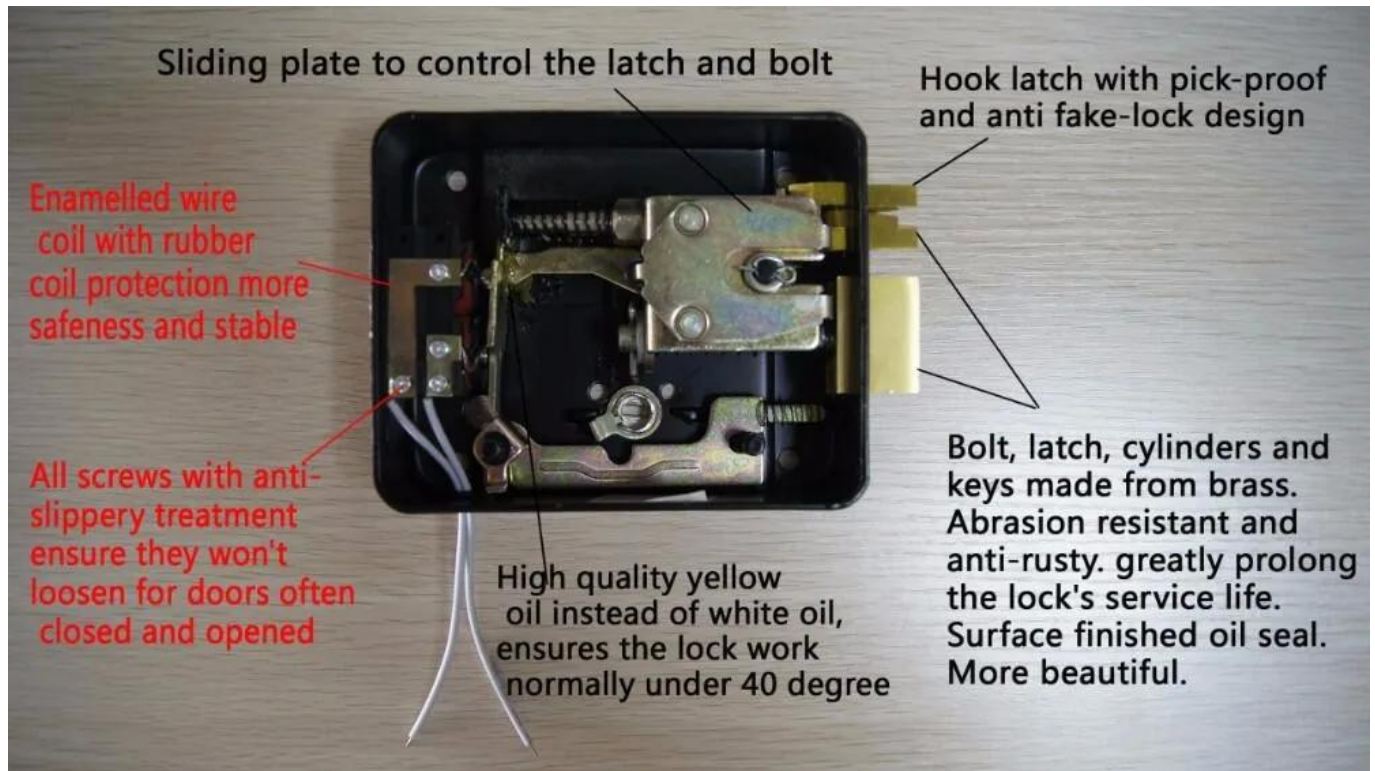

Our electric lock has used the most advanced production capabilities and the best production technologies.

The lock can be opened by electrical devices by turning the knob or key. It is highly secured and theft proof. It can also be avoided that the lock is opened with other tools.

This lock can be used for the doors of residential buildings, in particular for the public door of the residence, government buildings, schools, hotels, factory warehouses etc. It is also compatible with the electric control door.

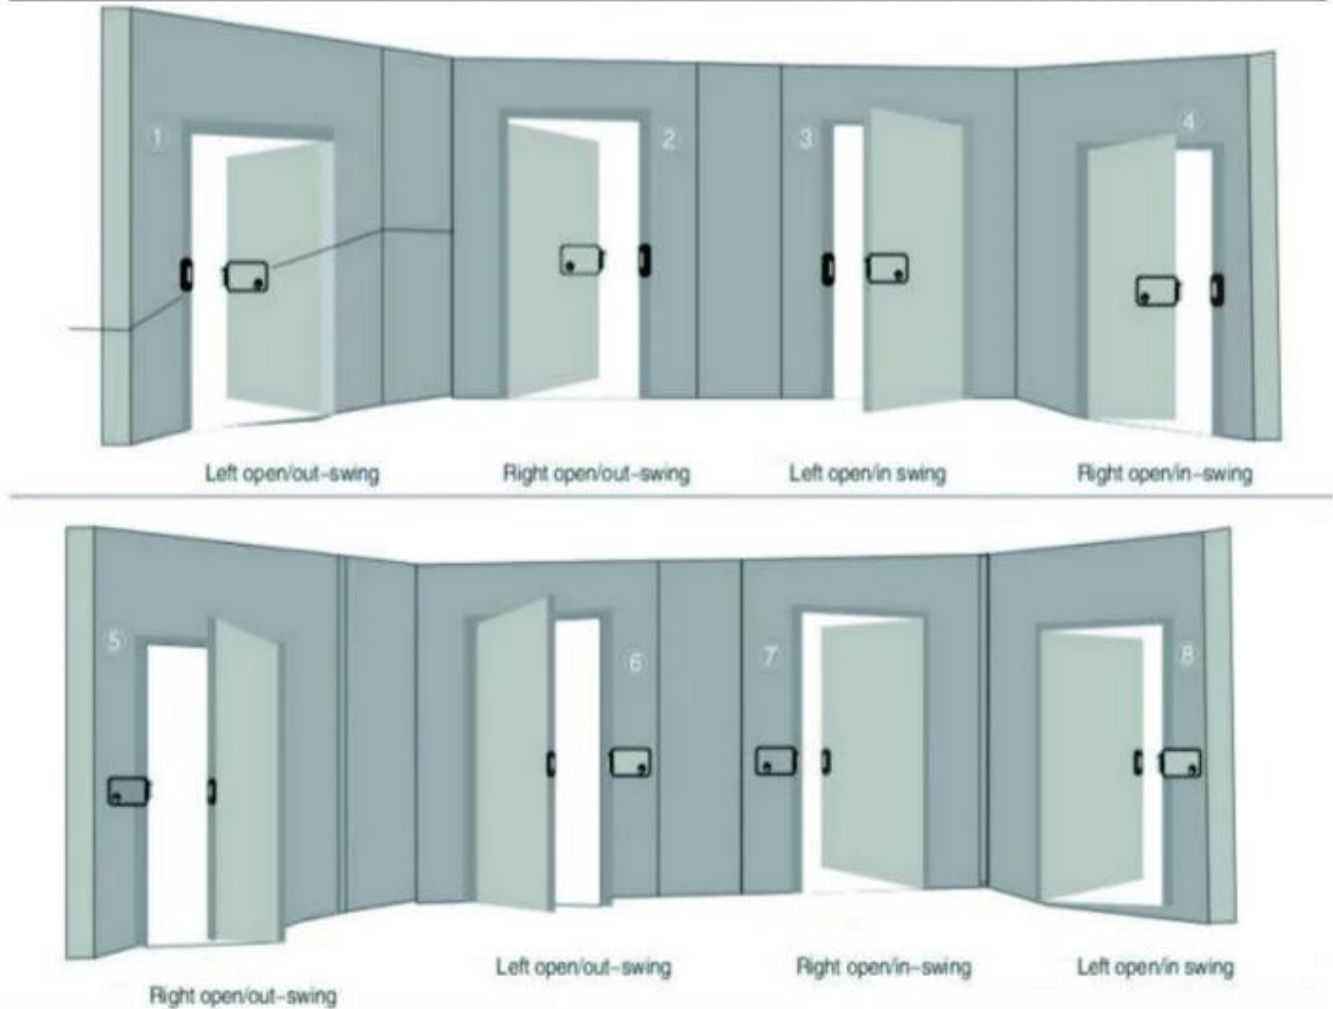

The coil in the lock is fireproof. If the device is turned on but the lock does not work, please check the installation or send it to the agent for repair.

The internal structure of this lock has been improved, preventing the lock from opening by knocking. That makes you safer.
