Smart Doorbell Installation

We recommend that you carefully consider the permanent location of your Smart doorbell, avoiding direct sunlight, as well as wind and rain.

The doorbell is supplied with 2x screws, double sided tape and 1x tamper alarm screws.

5.1 Should you not be able to use screws into walls or panels, double sided tape is applied to the housing.

1
Double faced
adhesive tape

5.2 Use the 2 screws to secure the housing into a an existing structure.

5.3 Install on the existing doorbell location, connect the AC Transformer.
Before you start, you must turn off the circuit breaker for safety purposes.
Remove existing doorbell from location and disconnect the wires.

System description

The smart doorbell can be connected via WiFi or cat5e LAN cable. When the visitor presses the button on the doorbell, their smart device interacts with the doorbell: * Through real-time video and full duplex conversation * Take photos and record videos that you save directly to your smart device or microSD card * Activate your internal doorbell with preset melodies and volume control

Other features include unlocking through smart devices. 1 administrator user and up to 10 guest users connect a bell.

Introduction to Windows software

The default Windows Client CMS account is admin, the password is blank, you can login username and password of the application. Onvif connects NVR you can make a great recording.
