

Hospital Operating Clean Room Environments AUTO Pedal Inductive Door Opener Feet Sensor Switch Foot Switch

What is Foot Sensor Switch?

Foot switch (photoelectric activation sensor) , fixed on the lower part of the wall (embedded), operated by foot without hand's touch. Usually it is used in circumstances that direct hand touch is not allowed to assure environment clean, such as operating clean rooms in hospital and food manufacturing industries.

Features:

With pull in & out socket for easy wiring

Adopt microcomputer control with exquisite design of stainless steel wire cover

Installation with hidden screw hole, easy to be fixed and stable performance

Widely be used in the operating room of hospital and laboratory to prevent hand pollution

Detection mode: Receive the open signal by the truncation of infrared ray which operated by foot

Active infrared ray of modulation-demodulation controlled by microcomputer
