Guidelines for Changing Locks

1 Door Lock Opening Direction

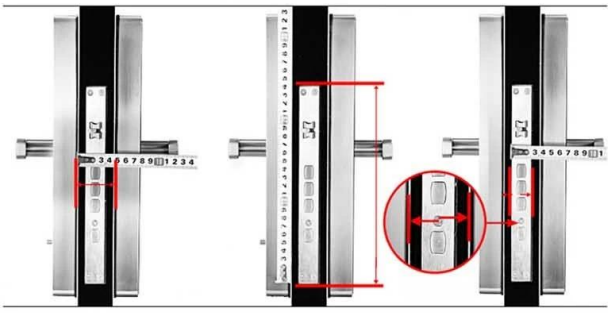
Tip : How to choose the lock opening direction?

Standing outside the door, where is the hinge mounted, which side is open

A、(Right push) — The hinge is mounted on the Right side of the door frame and push the door
B、(Right pull) — The hinge is mounted on the Right side of the door frame and pull the door
C、(Left pull) — The hinge is mounted on the Left side of the door frame and pull the door
D、(Left push) — The hinge is mounted on the Left side of the door frame and push the door

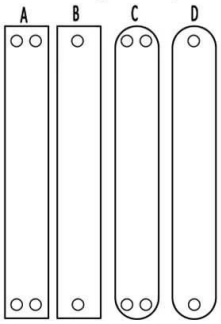
2 Measuring related dimensions

Friendly tip: For changing locks, must measure these 3 place as below



Measure door thickness | Measure guide piece length | Measure guide piece thickness

3 Choose guide piece model



A . Right angle double hole guide piece
B. Right angle single hole guide piece
C. Rounded double hole guide piece
D. Rounded single hole guide piece

Friendly tip:
The standard package one is "B",
if need other choice, pls contact supplier

4 Pls inform the related data

Door lock open direction	☐ Left push ☐ Left pull ☐ Right push ☐ Right pull
Door thickness	_____mm
Mortise guide-piece length	_____mm
Mortise guide-piece thickness	_____mm

Friendly tip :

If your door is customzied one,
only need to inform the
door thickness and opening direction .
