

Product Description

STYLE

Applications of our RFID Waste Bin Tag:

RFID is widely used to automate garbage collection. Our RFID tags can be placed inside or outside of trash cans. The tags are read using a RFID reader that is utilized by the drivers in the collection trucks.

Keeping track of trash bins manually requires time and mistakes are made. Trash containers with RFID tags allow waste management companies to operate more efficiently. It helps manage individual carts and customers. The tags have a unique programmed number that associates to a garbage cart and an address.
