### ACM

What is Touch display standalone access controller?

ACM Touch display standalone access controller is relative to the press buttons standalone access controller. Touch display controllers' design is more elegant and quality is stable, and usually used indoors. Standalone access control is simply used to open and close doors, has no software to check record.

Touch display standalone access controller all-in-one access controller have different design outlook and sizes to meet the needs of different doors or door frames.

ACM touch display access controller default voltage is 9-24V, and 90% of the access control machines with D1 D0 can be used as proximity card reader

Basically all standalone access controller have the same wiring method, the wiring is as follows:

## Product Description

### Product Introduction
