What is Hand Wave Sensor Button?

Hand Wave Sensor Button It is activated by hands waving. After correctly connected this sensor with your power supply and access control system, when you wave your hand at the sensor, the door will turn on automatically.

ACM-505MHW adopts 2.4G wireless communication technology, which has good frequency consistency and high wireless transceiver stability. The transmitter adopts low-power transmission technology, which has a long transmission distance, low power consumption and long battery life. The receiver adopts self-learning code matching, which is convenient for customers to add induction switches at any time. The receiver has a wide voltage input design, and the 12-30V DC power input is valid. The blue light is on when the remote control is valid, and you can confirm whether the switch is valid.

Standard 86 type switch panel, wireless design, installation free of wiring, more flexible installation. The panel adopts laser engraving technology, with backlight display, fashionable and fashionable.
