## Product feature

1. Use a nice control system and automatically lock the door by induction
2. If the customer wants to replace the general electric lock, save time, convenient, since the hole of the installation block is consistent
3. No direction restrictions apply, left, right, inside and outside and other types of other directions  
No shock, automatic reset, low noise, low power and small requirements for door closers
4. Lock size: 130x98x41mm
5. With feedback signal and LED light
6. Working voltage: 12 to 18 V
7. Working current: 100mA

[Detailed pictures, OEM / ODM available](#) More details for front / rear side e accessories

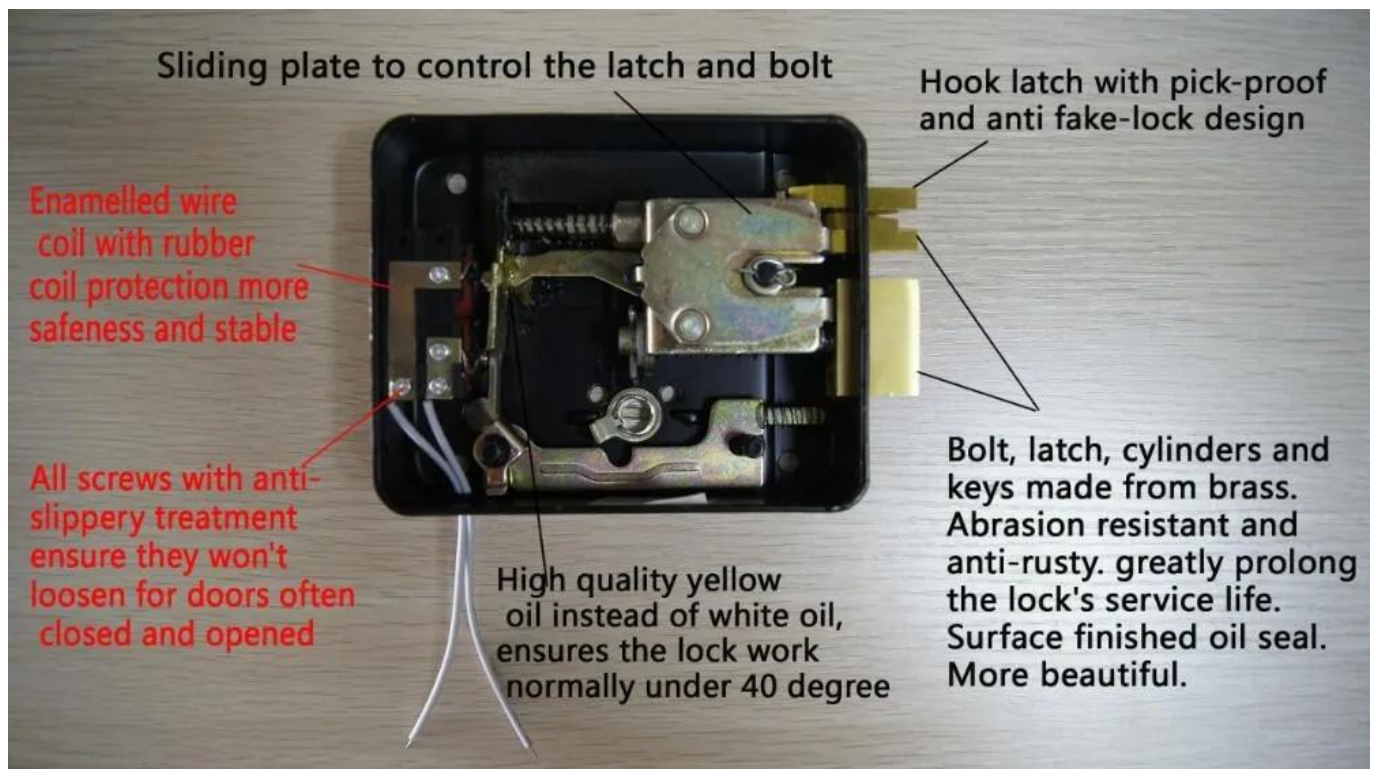

Our electrical control block has used the most advanced production capabilities and the best production technologies.

The lock can be opened by electrical devices by turning the button or key. It is highly secure and anti-theft. It can also prevent the other from opening the padlock with other instruments.

This lock can be used for the doors of residential buildings, in particular the public door of the residence, government buildings, schools, hotels, factory stores, etc. Also compatible with the electric control door.

The coil inside the lock is flame proof. It won't work when it works for a long time. If on but the lock does not work, check the installation or send it to the agent for repair.

The internal structure of this lock has been improved, preventing the opening of the lock by beating on it. this will make you more secure.

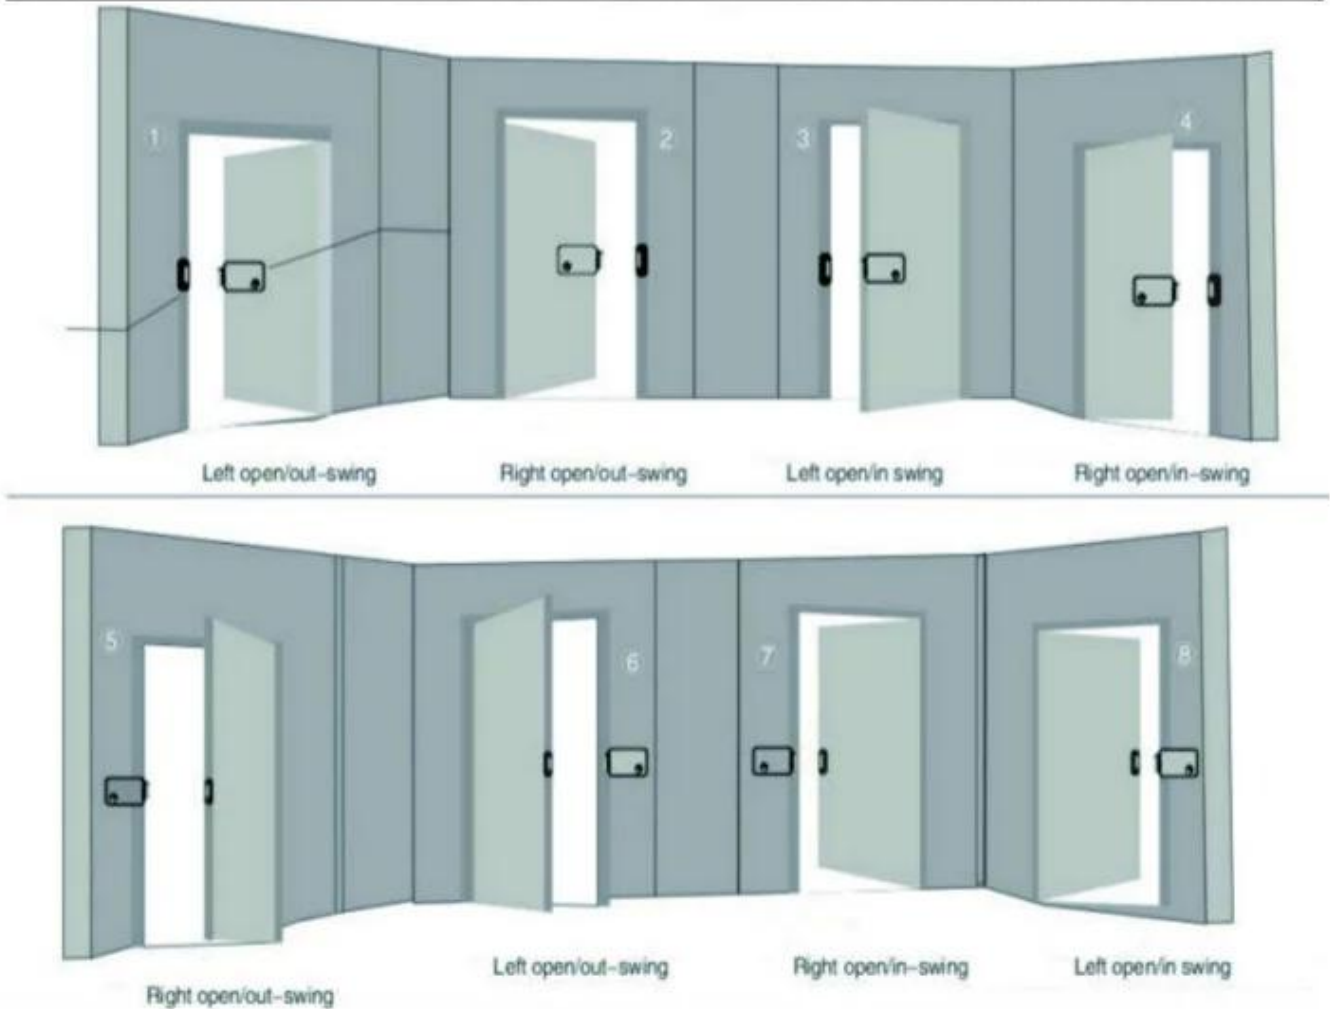

## Quality assurance

- The warranty service will be honored if the damage is not caused by humans, ACM Goldbridge provides 2 years warranty for related products.
- In contrast, ACM Goldbridge will fill up with extras if repaired.
