Spesifikasyon

Ürün adı	Hayvan Mikroçip At İzleme Çip Mikro RFID Köpek İmplant Hayvan Kimliği Çipi
Çip	Sığır Kedi Mikroçip Evcil hayvanları için mikroçip
Sıklık	EM4305
Okuma mesafesi	125khz
Malzeme	3-20cm okuyucunuza ve çipinize bağlı
Protokal	Biyo-cam
Boyut	ISO14443A
Dezenfeksiyon yöntemi	2*12mm, 3*15mm, 1.4*8mm, 1.25x7mm vb.
	EO (ACM)

Tip	Pasif
Menşeyeri	Guangdong, Çin
Hafıza	144byte/504byte/888byte
Örnekler	Numuneler kalite testiniz için ücretsizdir.
Başvuru	Kediler, köpekler, laboratuvar fareleri, evcil hayvan vizyonu, arowana, somon, atlar, tavşan izleme vb.

Pet informatin tracking

- 134.2K/125K FDX-B format with 16-bit encoding, most scanners can be read
- Small size and light weight
- Quickly and safely injects under the surface of pet's skin
- Wide range of applications, suitable for most pets, animal husbandry, fish, wildlife, etc.

WORKING PRINCIPLE

How Does Animal Microchip Work?

1. Scan the pet to verify whether he or she has a microchip that has been previously implanted.

2. Scan the microchip pack to verify that the microchip is functional, and that the ID code matches the accompanying barcode labels.

3. Implant the microchip, then rescan the pet to verify that the microchip can be localized.

4. Do not forget to record the tracking number of the microchip.

Implantation Sites for Microchips

Microchips are most often implanted in animals as outlined in the diagrams above. When scanning dogs and cats, begin in the neck area where the microchip is most likely to be located, but be sure to scan slowly and patiently. Scan repeatedly and over the entire body to ensure whether or not a microchip can be localized.

CUSTOMIZATION

Anti bacterial
